

## BIOGRAPHY

**Ms. Debbi Filson**  
***Configuration Management Officer Specialist***  
**Computer Sciences Corporation**

**Biography:**

Ms. Filson has more than 28 years in the Aerospace Industry. She began her career working at Hughes Aircraft Radar Systems in El Segundo, CA as a Technical Illustrator. Today she is a senior configuration management specialist at the Goddard Space Flight Center in Greenbelt, MD.

Ms. Filson is working on the Polar Orbital Environmental Satellite (POES) Project as the Configuration Management Officer and the liaison for ITAR and Logistics. Ms. Filson had implemented her first automated CM system more than 10 years ago when working with the Earth Science Data and Information Systems (ESDIS) Project. This automated CM system simultaneously supported 3 major NASA missions. Based on her ESDIS experience she has successfully guided seven NASA Projects in the automation of their CM systems. Ms. Filson has demonstrated the use of an automated CM process all over the world. She has presented her system to POES International Partners and contractors all over the world.
